 **BusterSci** I think the primary reason is the difference between 3" of snow and 9" of 03-06 06:46

snow is whether schools are open or closed and whether the commute is 3x longer and whether the DOT, tow companies and ERs need to staff up

 **Tim in Ky** The crosswind has become a tailwind even though the birection of the race 03-06 06:49

hasn't changed.

 **Tim in Ky** I wish there were an edit function. 03-06 06:50

 **BusterSci** I typically copy my message, delete it, paste it, then fix it. So yeah. I wish 03-06 06:51

there was an edit function, too. Especially when someone has posted after me and my long form edit ruins the flow.

 **Tim in Ky** 164 km, gap holding. I have to run an errand. Back shortly. 03-06 06:53

 **BusterSci** Also one of the reasons I like nicknames for the riders with names that are 03-06 06:54

complex and unusual to US eyes. I have no problems remembering how to spell Groanwagon.

 **BusterSci** Kasperkiewicz. We've gotta do something with that one. The Polish 03-06 06:56

 **BusterSci** Nah. That's even longer. 03-06 06:56

 **Donny** Jay Robert Thompson does not need a new name. I say kudos to mom and dad 03-06 07:09

denial?

 **Donny** I hate myself for having read both. 03-06 07:13

 **BusterSci** Nah. It's worth applying a BS filter to what Wiggo says and since Floyd 03-06 07:22

came clean I think he provides refreshing perspective without sanctimony (see David Millar.)

Tim in Ky I read both. I would like to read something from UCI or WADA.

03-06 07:23

BusterSci I'm not a fan of the current WADA regime. I think they're weak. Dick Pound tried a lot harder.

Tim in Ky Intermediate sprint results: 1. Thomson 3 points, 3 seconds 2. Kasperkiewicz 2 points, 2 secs 3. Grellier 1 point, 1 sec. Not that it matters.

03-06 07:26

BusterSci I think the primary thing I hope comes out of this is banning tramadol and corticosteroids.

03-06 07:27

Tim in Ky That would be good. Also ax TUEs. Gap is hold with 140 km to go.

03-06 07:28

BusterSci I would tweak the TUE system. If a TUE is required you're done racing for some period (may be dependent on type of drug.)

03-06 07:30

BusterSci Also, you'll be subject to enhanced testing during the TUE and recovery period.

03-06 07:30

Donny What I would like most is people to just stop f-ing cheating.

03-06 07:38

BusterSci I'd also like to see TUEs out of the hands of team doctors. They could still request, but maybe require approval and administration by a neutral doctor (perhaps from a national lab or university.)

03-06 07:39

BusterSci Donny, you're asking for armageddon there. Because people will only stop cheating when there are no people.

I said, "unlikely we have the same programming since we're 3 hours apart". We had a good giggle. The great news, is that this friend just purchased land less than a quarter mile from our land in VA. We will again be in the same time zone at some point in the future. :)
